Micro-miniature
100Kg/150Kg type.
Newly on Sale!

What makes this machine so convenient?

● Tough Body Made of Aluminum Die-cast

The body is made of strong light aluminum die-cast. The ratchet wheel has a guide for safety to prevent fingers from getting trapped.

● Micro-miniature in Size, but Equipped with Reliable Brake.

Adopted highly reliable brake that functions simultaneously with the stop order of hoisting up/down operation. The brake is non-asbestos type, highly reputed as the Elephant Y2-series.

● Grip Lever with the Sense of Ratchet Wrench

One-touch manipulation of the switching knob allows easy switching among "WINDING" "IDLING" "RETURN". The lever has excellent operability and adapts well to your hands.

● Silver Load Chain that Stands Severe Working Conditions

Specially surface treated load chain enables us to use it for maritime works.

● UP/DOWN Hook with Outstanding Toughness

The deep-throat hook, made of heat treated alloy steel, shows off tenacity and toughness even under overload.

Fastening Cargoes Function

The lightest lever hoist, equipped with safety brake function, ensures excellent clamping of heavy cargoes.

Obtaining a Strain Function

Excellent operability than turnbuckle, produces no kinks or burrs unlike wire-type, and lasts long.

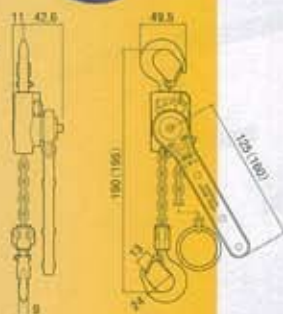

Winding UP/DOWN and Fixing Function

For short-lift, and light weight load, it can be used as a wire hoist or a chain block, allowing finer adjustment.

■ Dimensions

Figures in () are for YI-15
Unit: mm

■ Specifications

Model	YI-10	YI-15
Rated load	100kg	150kg
Standard lift	1m	1m
Minimum distance between hooks	190mm	195mm
Hand effort to lift full working load	16kg	16kg
Lever length	125mm	160mm
Net weight	0.8kg	0.9kg
